

# Quest DEH 3000 Digital Control

*Expertly Designed, Easy-to-Read Digital Control for Quest Dehumidifiers\**

Too much moisture in the workplace can not only create musty odors but also stimulate the growth of mold, mildew, bacteria, and other biological allergens. Moisture problems can lead to structural damage and serious health problems for the people who have to work in this environment.

To avoid the problems caused by moisture, and create a comfortable, safe working environment, a dehumidifier is necessary to maintain relative humidity between 30-50% throughout the area. Only supplemental dehumidification provides indoor humidity control regardless of air conditioner operation or outside moisture conditions.

The highly efficient Quest ventilating dehumidifiers are the answer to moisture and climate control problems. The Quest DEH 3000 Digital Control, with its sleek design and large, easy-to-read backlit LCD display, makes it easy to digitally control the relative humidity and air ventilation for maximum environmental comfort year round.

## Features:

- Digital control of relative humidity (Digital Set-Point)
- Fan filter operation
- Programmable ventilation timer
- Sleek design
- High temperature cut-out
- Dryout cycle timer
- Auto reboot
- Large, easy-to-read backlit LCD display

\* Units which can be controlled by the Quest DEH 3000:

Quest Dry 65  
Quest Dry 90  
Quest Dry 150

## Specifications

Part Number:	4027370
Model:	Quest DEH 3000 Digital Control
Electrical:	24 VAC
Humidity Range:	10 – 95% RH
Humidity Accuracy:	+/- 5%
Output:	3 Amps 24 VAC
Relay Capacity:	5 Amps
Temp Range/ Accuracy:	2%
Size:	4.95" wide x 4.19" high
